

Compatible platforms

MTL™800

- Provides a combination of 3 independent locking components to create a powerful locking solution
- Advanced patented key control – through unique coded Mul-T-Lock key card. Keys are only supplied by authorised Mul-T-Lock dealers. Patent protected until 2039
- Keyed to differ, keyed alike and master keying options available across all NE/NG padlocks.

MTL™600

- Increased security effectiveness – via patented high security technology, keys and telescopic pins
- Advanced patented key control – through unique coded Mul-T-Lock key card. Keys are only supplied by authorised Mul-T-Lock dealers. Patent protected until 2032
- Keyed to differ, keyed alike and master keying options available across all C-Series padlocks.

MTL™500

- Multi-layered security – with the integration of an advanced locking mechanism
- Advanced patented key control – through unique coded Mul-T-Lock key card, only readable by authorised Mul-T-Lock dealers with the correct key cutting machine. Patent protected until 2039
- Keyed to differ, keyed alike and master keying options available across all C-Series padlocks.

MTL™400

- Provides enhanced security – reliable key copy protection, high-grade components and improved capabilities at an affordable price
- Advanced patented key control – through the unique coded Mul-T-Lock key card. Keys are only supplied by authorized Mul-T-Lock dealers. Patent protected until 2033
- Keyed to differ, keyed alike and master keying options available across all C-Series padlocks.

MTL™300

- Robust locking system – functionality and advanced patented protection at a highly affordable price
- Advanced patented key control – through the unique coded Mul-T-Lock key card. Keys are only supplied by authorised Mul-T-Lock dealers. Patent protected until 2033
- Keyed to differ, keyed alike and master keying options available across all C-Series padlocks.

C-Series features

Variety of shackle sizes – 6, 8, 10, 13 & 16mm diameter

Hardened boron alloy steel shackle

Hardened steel shell

Deadlocking latch mechanism

Highly pick and drill resistant

Anodised Aluminium Core

Protective shutter preventing dust ingress

Can be used with the Mul-T-Lock Hasp

C-Series Padlocks Reseller

01902 364200

What is CEN rating?

CEN (Central European Norm) is a rating introduced to establish a standard for padlocks to ensure the correct padlock is specified for the job in hand. CEN ratings are typically issued by an independent testing body, rather than the manufacturer, to ensure that products are tested accurately. In order for a padlock to achieve a CEN rating it must pass a number of comprehensive tests to meet the standards set out by CEN.

- Grade 6** – Maximum Security
- Grade 5** – Extra High Security
- Grade 4** – High Security
- Grade 3** – Medium to High Security
- Grade 2** – Standard Security
- Grade 1** – Low Security

Look out for the CEN rating logos to ensure your padlock meets the standard you need.

Note: Adding a hasp or shackle protector considerably upgrades the level of security.
*Can not be supplied as removable shackle.
