

Peace of mind for you
and your family

Excellence as standard

Break Secure® 3XP complies with British Standard Kitemark BS EN 1303:2015 and TS007 3*, offering the very best protection in lock security.

Secured by Design

Police Preferred Specification

Recommended by the Police

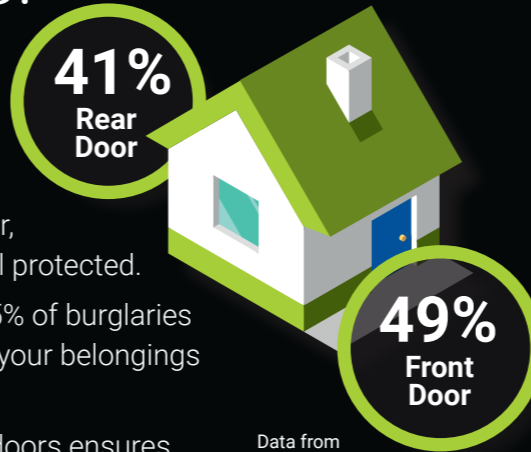

Break Secure® 3XP is endorsed by Secured by Design, the Police-preferred specification, for the ultimate peace of mind.

Don't become another
crime statistic!

It's important to know that your home is safe while you are out, and with official crime statistics showing that most burglars gain entry through the front or back door, it's vital to ensure your home is well protected.

Scotland Yard data indicates only 5% of burglaries are solved so you're unlikely to get your belongings back if targeted.

Fitting Break Secure® 3XP to your doors ensures that you won't become the next crime statistic!

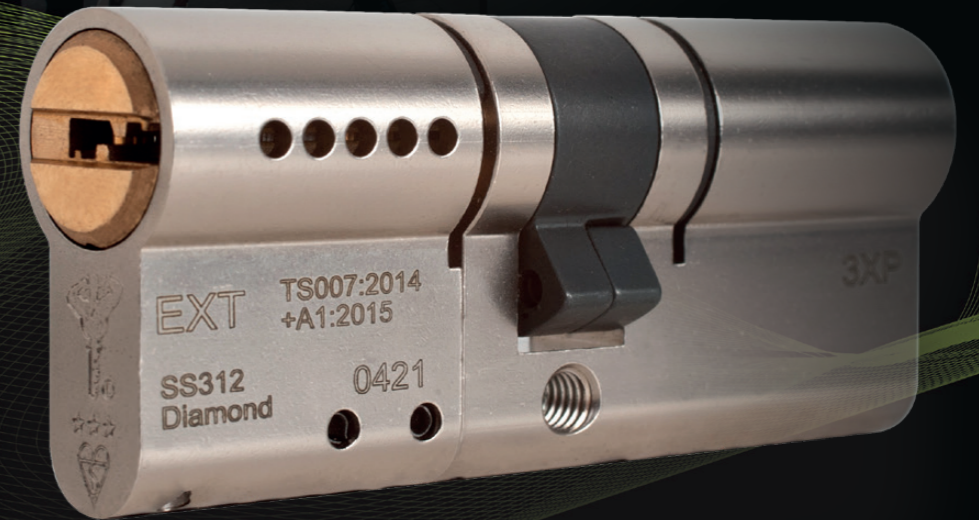

Data from the Office for National Statistics

REMEMBER...

- > After a burglary you're unlikely to get your possessions back
- > Some things are irreplaceable - don't risk it!
- > Burglary for theft of vehicle keys is at an all-time high
- > Insurance premiums are likely to increase after a break-in.

CHECK...

- > Does your door lock comply with the latest home insurance standards?
- > Do you know who has a key to your front door?
- > Do you know how many keys have previously been cut for your door?

**DON'T BE
A VICTIM**

Lock snapping

Lock snapping is a method of entry where burglars apply force to the lock cylinder, rendering the lock useless. The locks most at risk of this type of attack are fitted with a Euro profile cylinder, which are found in the majority of PVC-U and composite doors installed in the last 15 years and operate in combination with a multipoint lock.

MTL™ 300 Break Secure® 3XP

Why you'll love it... and why burglars hate it

- > Separate lines of defence to deter even the most determined attack
- > Snap-off front section, which will come away if attacked, giving the intruder less of the cylinder to grasp
- > Patent-protected dimple keys for maximum level of security
- > Anti-drill, anti-screw, anti-bump and anti-pick protection.

Be safe in your own home

1 Patent-protected dimple keys
For maximum key security protection.

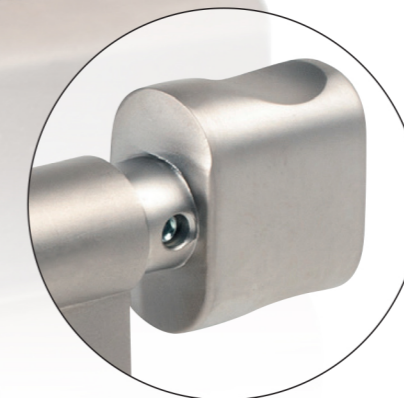

2 Sacrificial end
Designed to snap to protect against the most common forms of forced entry.

3 Bump resistant
Many cylinders can be easily 'bumped' - inserting and tapping an illegal key to release the cam and open the door. Break Secure® 3XP is proven to resist this.

4 Drill resistant
Engineered using high strength materials and robust construction to withstand prolonged drilling.

5 Tested
TS007 3* and SS312 Diamond Standard.

6 Key or thumb turn
Will still operate internally after the cylinder has been attacked.

BREAK SECURE® 3XP

Easy to fit

All you need is the correct size lock and a screwdriver!

Simply unscrew your interior handles, push the old lock out and put the new one in.

Guaranteed

We are so confident that Break Secure® 3XP will offer maximum protection to your home that we offer a full ten-year guarantee.

Patented key

Patented key for extra protection. Only Mul-T-Lock Approved Locksmiths can cut.

One-key house

For high security with the ultimate convenience ask your locksmith about a keyed alike option for your Break Secure® 3XP cylinders, so that one patented key can unlock all your front, back, patio and other external doors.
