

Offering greater security and ease of integration

MTL™600 provides a combination of protective elements to create a double locking mechanism, making this platform an ideal locking solution for customers looking for more than the standard locking solution.

Enhanced key copy control

Give your customers the peace of mind they want and deserve. Mul-T-Lock takes every possible measure to reduce unauthorized key duplications.

The MTL™600 patented system together with a unique magnetic card grants your customers enhanced key copy control.

Improved keying technology

Patented floating element - a patented moving element on the key blade's tip, engages with a unique pin at the rear of the cylinder, creating an added security layer

Backward compatibility

MTL™600 offers the integration of an up-to-date solution with existing systems across numerous existing suits. Allowing for a gradual transition and a balanced budget.

Patented floating element

Comprehensive range of products

 Breaksecure Cylinders	 Euro Single and Double Cylinders	 Euro Turn Cylinders
 Rim and Mortice Cylinders	 UK Oval Cylinders	 Bullet Locks
 Scandinavian Oval Cylinders	 Anti-Lig Cylinders	 Classroom Cylinders
 Cam Locks	 Switch Cylinders	 Drawer Locks
 NE/NG Padlocks	 C-Series Padlocks	 Diamond Hasplocks

Please refer to the Mul-T-Lock price list for availability

AntiBacterial KEY BLANKS

Its all about your client's safety. Ask us about our AntiBacterial Keys, available across all cylinder platforms.

MUL-T-LOCK®

MTL™ 600

Multi-layered patented technology

Scalable high security and advanced key control

MTL™ 600 locking system provides superior security and is designed to address evolving security needs by combining several technological elements.

Together, these elements create stronger resistance against different forms of lock manipulation and grant you the flexibility you need when your business grows. MTL™ 600 complies with the most stringent international standards, ensuring enjoy peace of mind when securing valuable assets.

Features & benefits

- Provides a combination of protective elements to create a double locking mechanism
- Patented floating element - a patented moving element on the key blade's tip, engages with a unique pin at the rear of the cylinder, creating an added security layer
- Keyed-alike and master keyable for added convenience
- Wide range of cylinder and padlock types and sizes to fit every application
- Quick and easy to pin and assemble, using the same key machine and pinning kits as Mul-T-Lock's previous patented platforms
- Patented key protection until 2028 for guaranteed legal protection against unauthorised key duplication
- Bespoke key inserts to promote your business
- Flat reversible key with variety of key options from nylon head, nylon head with key inserts, all metal and anti-bacterial

Resistant to:

Unique oval pin for enhanced tamper resistance

10 telescopic pins tumbler mechanism for a robust internal structure

A patented floating element for extra key control and pick resistance

Advanced keying options

MTL™ 600 offers a variety of keying options together with a master keying hierarchy for different locking products and environments.

Construction

Provides access to multiple doors with a common key, then instantly switches to unique combinations when necessary, rendering the common key useless once construction is completed.

Keyed Alike

Access multiple doors with a single key.

Keyed Different

Access each doors with a different key.

Emergency

Operated with keys inserted and rotated on opposite sides, enabling both sides to be permanently operational.

3 in 1

Instantly change a lock's combination up to 2 times by simply turning a key.

Break Secure

Designed to snap off when attacked, leaving the main portion of the cylinder intact and fully functioning.

Flex Control

Provide access when and to whom you want, and then limit it when you don't.

Master Keying Systems

Assign various levels of access to a user's key.

Powerful master keying capabilities

MTL™ 600 supports large and complex master key systems, incorporating hierarchy and matrix requirements, even within the same suite.

The backward compatibility function enables your customers to secure their facilities with an up-to-date, high security solution, while the new master keys remain compatible with previous products.

In addition, customers can gradually upgrade their existing systems, rather than replacing the whole system at once, saving them precious financial resources.

Several key profiles are available to add complexity and capabilities to master key systems.

MTL™ 600 can handle complex master key systems and can be easily expanded upon as a business grows.

KC5 key machine

Easy, fast and efficient, the smart KC5™ keycutting machine pushes the boundaries with electronic control and self-calibration. Simple to use, it can handle keys for all Mul-T-Lock cylinder platforms, including MTL™ 600.

Build long-lasting customer relationships:

Automatic cutting

With Mul-T-Lock's KC5™ software interface, you'll be able to automatically cut large series of MTL™ 600 keys, easily and conveniently.

On-site engraving

An add-on kit allows you to offer and deliver more to your customers, faster. We value and support our partners!

If you already use the KC5™ key cutting machine, we've made sure you'll be able to continue using it with the MTL™ 600, without having to overhaul your same tooling or pinning kit.

The KC5 offers:

Compact II key machine

Mul-T-Lock Machinery's compact manual key-cutting machine is a modern, high-precision, CE-certified machine that cuts Mul-T-Lock cut-to-code keys for the MTL™ 400 and MTL™ 600 series.

Set to the correct combination via the key registration card – included in the original package sold to the customer – the machine cuts keys according to the manufacturer's initial specifications. Cutting is performed one side at a time, allowing for a different combination on either side of a single key blank.

The machine features a new depth-setting mechanism – whose patent is pending in many countries worldwide – and is capable of cutting side and back pins. It is lightweight, weighing only 20.6 kg (45 lbs), and is conveniently equipped with a handle for portability. The machine can be used in vehicles with a suitable power supply (not included).

The Compact II offers:

The cylinder's milled pattern can be used to create exclusive keyways, providing home and business owners with the flexibility they need to meet their specific needs.
