Security that
won't let you down

Security that won't let you down

A padlock is intended to offer high security and an ability to deter a break-in. But this can only be achieved if the right padlock is specified. However, any security is only as good as its weakest link. Knowing the difference between a traditional padlock type and the right padlock for the application is key.

What is CEN rating?

Introduced to establish a standard for padlocks, CEN ratings ensure the correct padlock is specified for the job in hand. To guarantee products are tested accurately, ratings are issued by an independent testing body. Padlocks, therefore, must pass a number of comprehensive tests to meet the standards, so look out for the CEN rating logos to ensure your padlock is fit for purpose.

- Grade 6** - Maximum Security
- Grade 5** - Extra High Security
- Grade 4** - High Security
- Grade 3** - Medium to High Security
- Grade 2** - Standard Security
- Grade 1** - Low Security

What is Sold Secure rating?

Sold Secure is the premier testing and certification house for security products. Our NE/NG Padlock Series has endured rigorous testing to achieve a Diamond, Gold, Silver and Bronze Sold Secure rating, giving you peace of mind and the highest level of security.

Key security

Mul-T-Lock NE/NG series padlocks are available on all patented key platforms, offering additional key security. They are available in all of our saleable variants of keyed to differ, keyed alike and master keyed. Patented key padlocks are supplied with a dedicated security card which forms part of a strict security protocol required to obtain additional keys when required.

Master key

Where multiple padlocks are required as part of an overall security system, Mul-T-Lock master key systems enable each padlock to have its own key, yet authorised personnel can have a key which can open specified, or all padlocks, as desired.

Keyed alike

Mul-T-Lock NE/NG series padlocks can be keyed alike. This means if you have two or more, they can be configured to allow you to operate them using the same key for all locks.

MTL™800 MTL™600

- Provides a combination of 3 independent locking components to create a powerful locking solution
- Advanced patented key control – through unique coded Mul-T-Lock key card. Keys are only supplied by authorised Mul-T-Lock dealers. Patent protected until 2039
- Keyed to differ, keyed alike and master keying options available across all NE/NG padlocks.
- Increased security effectiveness – via patented high security technology, keys and telescopic pins
- Advanced patented key control – through unique coded Mul-T-Lock key card. Keys are only supplied by authorised Mul-T-Lock dealers. Patent protected until 2032
- Keyed to differ, keyed alike and master keying options available across all NE/NG padlocks.

MTL™500 MTL™400

- Multi-layered security – with the integration of an advanced locking mechanism
- Advanced patented key control – through unique coded Mul-T-Lock key card, only readable by authorised Mul-T-Lock dealers with the correct key cutting machine. Patent protected until 2039
- Keyed to differ, keyed alike and master keying options available across all NE/NG padlocks.
- Provides enhanced security – reliable key copy protection, high-grade components and improved capabilities at an affordable price
- Advanced patented key control – through the unique coded Mul-T-Lock key card. Keys are only supplied by authorised Mul-T-Lock dealers. Patent protected until 2033
- Keyed to differ, keyed alike and master keying options available across all NE/NG padlocks.

MTL™300 Integrator®

- Robust locking system – functionality and advanced patented protection at a highly affordable price
- Advanced patented key control – through the unique coded Mul-T-Lock key card. Keys are only supplied by authorised Mul-T-Lock dealers. Patent protected until 2033
- Keyed to differ, keyed alike and master keying options available across all NE/NG padlocks.
- Enhanced tamper resistance – through a combination of unique design elements
- Advanced patented key control – through the unique coded Mul-T-Lock key card. Patent protected until 2023
- Keyed to differ, keyed alike and master keying options available across all NE/NG padlocks.

All padlocks in the NE/NG range are available across each of the above platforms.
