

# eCLIQ System:

The key to electronic locking

CLIQ®

**MUL-T-LOCK®**  
HIGH SECURITY ACCESS SOLUTIONS

# eCLIQ: The key to electronic locking

## More secure and more efficient than conventional locking systems

CLIQ® is a security locking system with high-end microelectronics, programmable keys and cylinders. eCLIQ offers a completely electronic locking system to match different security and flexible access needs.

A wire free system, each key can be programmed and updated individually to allow access to specific areas at specific times and dates, accommodating constantly changing access requirements and ensuring maximum flexibility.

The intuitive software makes it simple to manage access rights, enable and disable keys and customize access schedules, on site or on the go.

Software to manage access rights for different users, doors and time periods

Range of programming devices to locally & remotely transfer and update access rights for keys

Programmable, battery powered keys

Wide range of programmable cylinders and padlocks to secure different access points

# Physical Security

CLIQ® technology provides flexibility and security for your locking solution

Simple and quick installation of cylinders without wiring

Compact, programmable, reversible, water resistant key (IP67) with LED function display and audio.

New, future-oriented CLIQ® AES chip generation encryption and fast processing speed with efficient energy management

The electronic contact between keys and cylinders transmits power and data securely.

Fast, easy standard battery replacement in the key – no need for special tools.

Keys and cylinders can be programmed with flexible access rights and schedules.

# eCLIQ fits everywhere

## Easy installation – no wiring required

The compact eCLIQ locking cylinder offers the highest levels of security. With the widest range of different cylinder types, the system is designed for every kind of use from the company entrance gate to securing the alarm systems, lifts, doors and cabinets.

The system offers certifications for all areas of use, including external areas, ensuring building operators comply with current and future regulations.

# An investment that impresses in numerous ways:

## eCLIQ – total design flexibility

- Modular system
- Wide range of locking cylinders
- 200,000 cycles of maintenance-free use
- Easy installation, no wiring
- Large variety of applications

Industrial Enterprises

Utility Companies

Energy Companies

## Keys

- Compact key design ensures stability for problem-free, long-lasting operation
- Protected against temporary immersion in water (IP67)
- Reversible key: Always fits, regardless of which direction it faces when inserted in the cylinder
- Available in three versions (E1 basic, E2 time and E3 remote)
- Visual and audio signalling for access rights and battery status
- Integrated standard battery (CR2450 lithium cell) Battery replacement in the key does not require any special tools.

### Programming key

The red programming key is used to transmit changes in authorisation and event logs between the software and locking cylinders. The key also authorizes the use of the software.

### eCliq Connect

Communicates with a smart phone or tablet using Bluetooth® Low Energy (BLE)

Receives changes to authorizations and time settings using the CLIQ® Connect App.

Stores audit events to keep track of exact access times of users

Each key is individually programmable, so access rights can easily be deleted for higher security and complete control

### User key E1, E2, E3

#### E1 basic

for simple access authorizations, programming only for Desktop programmer

#### E2 time

with time-restricted access authorizations and event logs

#### E3 remote

with time-restricted access rights and event logs plus temporary issuance of access rights

### eCLIQ also available with transponder

Key with integrated RFID chip for integration into access control systems.

# eCLIQ system components

## Cylinders

- High-security protection against manipulation and intelligent break-in attempts
- Integrated microchip for storage of locking authorizations and event logs
- Use in environments with demanding ambient conditions (Temperature range: -25°C to +85°C)
- Maintenance-free up to 100,000 cycles
- (includes integrated lubricant reserve)
- Central key channel and low core overlap for problem-free installation in combination with security fittings and other locks
- Optional enhanced drilling protection
- Emergency mechanism with user key

### Cylinders and Padlocks

The cylinders automatically register all programmed access entitlements and locking processes.

#### Authorizations

1,000 memory cells for individual keys and groups (each containing over 65,000 keys)

#### Locking functions

up to 1,500 keys

#### Event memory

up to 1,000 events

#### Wide range of applications

Euro, Cam22, Rimo, KIK, Padlock NE, etc.

#### Optional dust and rain protection cap

Outdoor cylinders designed for all weather conditions, e.g. on radio masts. The cap ensures IP55 and fits all cylinder types.

# eCLIQ system components

## Management software

**PC application**  
Desktop version

**Web Application**  
System Management  
from any location

### CLIQ® Web Manager

- Internet application for multiple administrators, used on the client through a standard web browser accessed by the client
- Ideal for managing very large locking systems as well as locking systems spread out over multiple locations
- Enhanced search functions, intelligent assignment and filter functions
- Improved design and “step-by-step” user guidance (requires less training)
- Simple installation and administration through platform-independent design
- Central server and data storage completely network-compatible client/server design – Mul-T-Lock offers Software as a Service Hosting
- Network connections, 128-bit SSL encryption plus the security afforded by software certificates on client and server

# eCLIQ system components

## Programmer

The programmer permits changes to times and authorizations (depending on key type) as well the read-out of audit trails.

**Desktop Programmer**  
Used locally and centrally

### Desktop programmer

- Communication interface for secure data transmission between CLIQ® Manager and programming key
- Programming of user keys (E1, E2, E3) and reading station for the audit trail memory in the user key (E2+E3)
- Access rights in the software (e.g. time zone, summer/winter time) are uploaded to the user keys and programming key
- USB port

**Wall-mounted programmer**  
Used locally and in off site locations

### Wall-mounted programmer

- Programming of temporary access of user keys (e.g. valid for 24 H.)
- Programming tasks run automatically with optical and acoustic signals
- Battery alert service
- Power supply via 12 – 24 V mains connection or "Power over Ethernet"
- Outdoor version for areas required to be vandal proof (protection rating IP65 and IK09 - vandal proof)
- USB port
- Waterproof (protection from drips)

**Mobile programmer**  
Location independent and used directly at the key carrier

### Mobile programmer

- Permits changes to times and authorizations for user keys (E3) as well as the read-out of audit trails
- Receives programming changes to the user key via mobile or PC
- Acoustic and optical signals for operating status and activity progress
- Data transfer to the mobile via Bluetooth and to the PC via USB, no software installation on the mobile programmer
- Battery alert service
- Power supply from standard batteries (4 x type AAA)
- USB port
- Waterproof (protection from drips)

## ABOUT MUL-T-LOCK®

For over five decades, Mul-T-Lock® has been a worldwide leader in developing, manufacturing and marketing high-security access solutions for institutional, commercial, industrial, and residential applications.

We provide a wide range of high-security and high-quality locking solutions. The company holds dozens of international patents for our innovative user-friendly products, which provide safety, security, and convenience to millions of people across the world.

Mul-T-Lock® is fully owned by the ASSA ABLOY Group, a global leader in access solutions with a proven track record in helping billions of people experience a more open world through innovations that enable safe, secure and convenient access to physical, and digital places.
