

MUL-T-LOCK®

 SMARTAIR®
Your Access. Your Control.

Secure your building in seconds

Lockdown, real-time, emergency security
when you need it

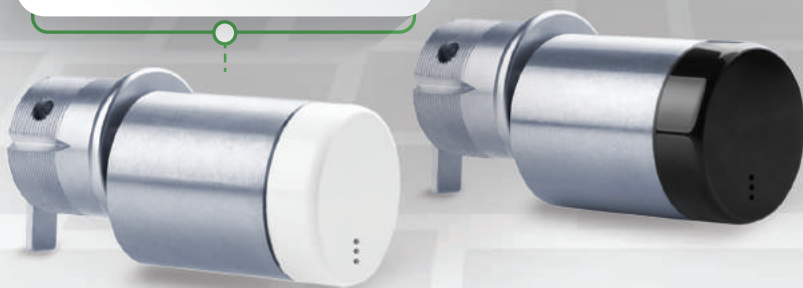

Experience a safer
and more open world

SMARTair i-max is robust, innovative and elegant electronic escutcheon. I-max offers a sophisticated design, multiple finishes and an extra-resistant locking mechanism. SMARTair i-max is perfect for environments where intelligence, design and functionality must stand out.

SMARTair i-gate padlock can be integrated, controlled and monitored, in real time for exterior, non-electrified gates and fences, interior closets, cupboards and cabinets and anywhere currently secured by padlock.

SMARTair Wall Reader is a unique access control solution designed for simple installation and operation. The Wall Reader operates magnet locks, electric strike or electronic locks.

The SMARTair Knob Cylinder is an easy-to-use, simple-to-install, and highly effective electronic cylinder that can be integrated with other SMARTair locking elements - in one Access Control system managed by SMARTair Software.

Emergencies brought under control

This is Lockdown

New SMARTair® Lockdown functionality gives your premises an instant **security boost when danger threatens**, whether a fire, intruder or terrorist attack.

With Lockdown initialized, you can **Open, Close or Block** every access in response to the emergency — helping keep everyone at your facility safer.

Designed for:

Schools, colleges, universities

Hospitals, clinics, laboratories

High traffic offices

Global Lockdown offers 3 different options:

Emergency Open

Devices switch to open mode. Opening without any credential, free entry or exit.

Emergency Close

Devices switch to standard mode. Opening with authorized credentials.

Emergency Block

Devices switch to block mode. Opening only with authorized credentials with the right to open blocked doors.

Easy, flexible operation

How do you activate Lockdown?

TS1000 Software

- Select the emergency area or areas
- Select the type of Lockdown (Open, Close or Block)

Web Manager

Three activation modes

Emergency Button or Signals from fire/alarm system

- Connect up to 2 independent input signals to each Hub
- User through pushbuttons or Fire/Alarm systems can activate lockdown
- Functionality:
 - Define lockdown type
 - Assign affected area (all, one or several lockdown areas)

Tailored response

Lockdown safe zones: take quick, accurate decisions in an emergency

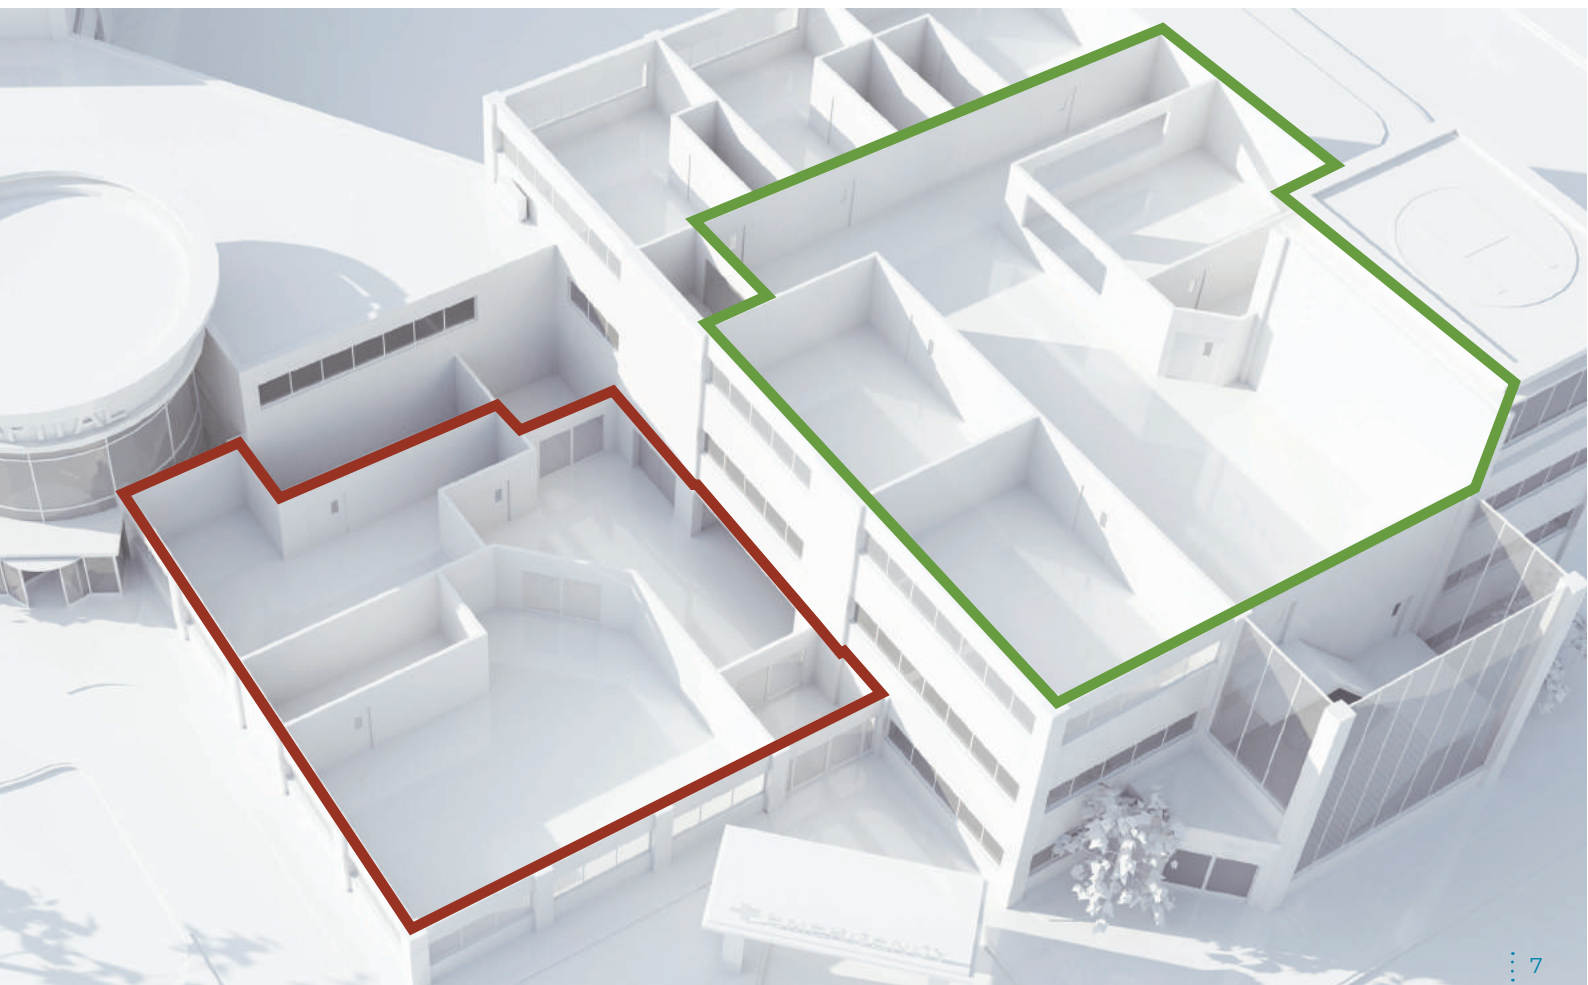

In any activation mode, the signal is immediate and simultaneous, deployed to all areas previously defined in the management software.

How you define and work with lockdown safe zones

- 01** Define any areas which Lockdown can affect independently
- 02** Within each area, choose which doors to integrate with the Lockdown feature
- 03** In an emergency, you decide whether to secure the whole building or just part of it

When you choose SMARTair Wireless Online management system, Lockdown is easy and cost-effective to install, without cabling or wires.

Define safe areas and Block or Unblock them in an emergency situation.

ABOUT MUL-T-LOCK®

For five decades, Mul-T-Lock® has been a worldwide leader in developing, manufacturing and marketing high-security access solutions for institutional, commercial, industrial, and residential applications.

We provide a wide range of high-security and high-quality locking solutions. The company holds dozens of international patents for our innovative user-friendly products, which provide safety, security, and convenience to millions of people across the world.
