

# MTL™ 800

PREMIUM PROTECTION LOCKING SYSTEM

# MTL™800

## PREMIUM PROTECTION LOCKING SYSTEM

As a worldwide leader in high security locking solutions, Mul-T-Lock is renowned for developing key, innovative locking solutions for residential and commercial spaces. Designed for supreme protection, flexibility, and convenience, MTL™800 is the latest product to extend Mul-T-Lock's proven track record of success, and enhance consumer security.

MTL™800 provides a combination of protective elements to create a triple locking mechanism, making this platform an ideal choice for customers looking for more than the standard locking solution.

The cylinder's milled pattern can be used to create exclusive keyways, providing home and business owners with flexibility to meet their specific needs.

### POWERFUL MASTER KEYING CAPABILITIES

MTL™800 supports large and complex master key systems, incorporating hierarchy and matrix requirements, even within the same key system.

The backward compatibility function enables you to secure your facilities with an up-to-date, high security solution, while the new master keys remain compatible with previous products.

In addition, you can gradually upgrade your existing systems, rather than replacing the whole system at once, saving you precious financial resources.

**AntiBacterial**

MTL™800 is available in AntiBacterial Keys.

ITS ALL ABOUT YOUR SAFETY.  
ASK US ABOUT OUR ANTIBACTERIAL KEYS.

MTL™800 meets international standards to offer enhanced resistance to

**picks**

**drills**

**bumps**

and other forms of lock manipulation, so your assets remain secure, always

## ENHANCED KEY CONTROL

Rest assured, Mul-T-Lock takes every possible measure to reduce unauthorized key duplication.

With Mul-T-Lock, you know you are in good hands. We are the world renowned brand that makes it possible for you to buy a premium cylinder platform with patent-protected keys through a global, authorized dealer network.

The MTL™ 800 key control system is employed through a unique card with a magnetic strip that holds your unique key code encrypted. The key-cutting control card grants its holder the ability to order additional keys.

A certified key cutting procedure can be implemented when the original magnetic card is presented to an authorized Mul-T-Lock dealer who owns a KC5™ key-cutting machine.

## IMPROVED KEYING TECHNOLOGY

Double alpha spring - a patented moving element on the key blade's tip, engages with a unique pin at the rear of the cylinder, creating an added security layer

## BACKWARD COMPATIBILITY

MTL™ 800 offers the integration of an up-to-date solution with existing systems across numerous key systems allowing for a gradual transition.

### DOUBLE ALPHA SPRING:

A patented moving element on the key blade's tip engages with a unique pin at the rear of the cylinder, creating an additional shearline

Telescopic pinning technology is the foundation of our durable cylinder system

 A locking bar mechanism forms a powerful security layer

## ABOUT MUL-T-LOCK®

For nearly five decades, Mul-T-Lock® has been a worldwide leader in developing, manufacturing and marketing high-security access solutions for institutional, commercial, industrial, and residential applications.

We provide a wide range of high-security and high-quality locking solutions. The company holds dozens of international patents for our innovative user-friendly products, which provide safety, security, and convenience to millions of people across the world.

Mul-T-Lock® is fully owned by the ASSA ABLOY Group, a global leader in access solutions with a proven track record in helping billions of people experience a more open world through innovations that enable safe, secure and convenient access to physical, and digital places.
